

HOW TO CALCULATE YOUR SCORE

Section I: Multiple Choice

$$\left[\frac{\text{Number Correct (out of 50)}}{\text{Number Wrong}} - \frac{1}{4} \times \frac{\text{Number Wrong}}{\text{Number Correct (out of 50)}} \right] \times 1.3500 = \text{Weighted Section I Score (Do not round.)}$$

Section II: Free Response

$$\text{Question 1 (0-9 points)} + \text{Question 2 (0-9 points)} + \text{Question 3 (0-9 points)} = \text{Free-Response Score}$$

$$3.0556 \times \text{Free-Response Score} = \text{Weighted Section II Score (Do not round.)}$$

Composite Score:

$$\text{Weighted Section I Score} + \text{Weighted Section II Score} = \text{Composite Score (Round to the nearest whole number.)}$$

Composite Score*	AP Grade	Interpretation
112-150	5	extremely well qualified
95-111	4	well qualified
76-94	3	qualified
48-75	2	possibly qualified
0-47	1	no recommendation

*Each year the Development Committee determines the formulas used to calculate the raw composite scores. The Chief Faculty Consultant determines how the composite scores fit into the 5-point AP scale.
